# DKG-329 AUTOMATIC TRANSFER SWITCH CONTROLLER

# WITH UNINTERRUPTED TRANSFER AND MULTIPLE GENSET SUPPORT

## **DESCRIPTION**

The DKG-329 is designed to monitor 3-phase mains voltages, send remote start command to generating sets and control the changeover of both generator and mains contactors.

The unit offers an internal synchroscope for uninterrupted transfer in both directions. The number of gensets to run before transfer is selectable, allowing multiple genset support.

If a fault condition occurs, the unit disables the remote starting automatically and indicates the failure with the corresponding led lamp and text.

The unit provides a comprehensive set of digitally adjustable program parameters. The unauthorized access to program parameters is prevented by a 3 level password system. All programs may be modified via front panel pushbuttons and do not require any external unit.

Last 100 faults are stored in the event log file. The event log includes not only the date-time information, but also a comprehensive list of measured parameters at the time that the fault has occurred.

The WINDOWS based RAINBOW program allows remote monitoring and control.

The unit supports MODBUS protocol enabling communication with PLCs and building management systems. The MODBUS protocol is also supported through GSM and PSTN modems.

The unit offers multiple language support.

# **MEASUREMENTS**

Generator Volts: L1-N, L2-N, L3-N Generator Volts: L1-L2, L2-L3, L3-L1

Generator Frequency

Mains Volts: L1-N, L2-N, L3-N Mains Volts: L1-L2, L2-L3, L3-L1

Mains Frequency Load Amps: L1, L2, L3 Load kW: L1, L2, L3, total Load kVAr: L1, L2, L3 Load pf: L1, L2, L3, total Synchroscope Phase Angle

**Battery Voltage** 

## **FEATURES**

True RMS measurements Synchroscope & check synch No break transfer& no break load test Automatic contactor control Multiple genset system support Load shedding, dummy load Event logging with time stamp and measurements Battery backed-up real time clock Built in daily / weekly / monthly exerciser Weekly operation schedule programs Field adjustable parameters RS-232 serial port Free MS-Windows Remote monitoring SW GSM and PSTN modem support GSM SMS message sending on fault **MODBUS** communications Multiple language support Customer logo display capability 16 Amp contactor outputs 1 Amp DC semiconductor control outputs Configurable digital inputs: 7 Configurable digital outputs: 3 Total digital outputs: 6 I/O expansion capability Plug-in connection system Sealed front panel

#### **DIGITAL INPUTS**

The unit has 7 configurable digital inputs. Each input has following programmable parameters:

-alarm type: shutdown / load\_dump / warning / no alarm -alarm polling: on engine running / always / on mains OK

-latching / non-latching operation,

-contact type: NO / NC -switching: BAT+ / BAT-

#### **OUTPUTS**

The unit provides 6 digital outputs and 3 of them have programmable functions, selectable from a list. Any function or alarm condition may be output as a relay output. Using two Relay Expansion Modules, the number of relays may be increased to 22, 16 of them being volt-free contacts.

#### **EVENT LOGGING**

The unit records last 100 events with date-time stamp and a total of 14 measured parameters.

# TELEMETRY AND REMOTE PROGRAMMING

The unit provides the user with large telemetry facilities via its standard RS-232 serial port, connecting either to a PC, PLC or a GSM or PSTN modem. It supports both RAINBOW and MODBUS communication protocols. The standard PC software offers local and modem operation capabilities as well as modem networking feature.

The PC program is used for below purposes:

-parameter upload/download

-remote monitoring and control

-diagnostics and analysis

The MODBUS interface allows the unit to be integrated in building management systems.

# **TECHNICAL SPECIFICATIONS**

Alternator voltage: 0 to 300 V-AC (Ph-N)
Alternator frequency: 0-100 Hz.
Mains voltage: 0 to 300 V-AC (Ph-N)
Mains frequency: 0-100 Hz.
DC Supply Range: 9.0 to 33.0 V-DC
Cranking dropouts: survives 0 V for 100ms.
Typical Standby Current: 100 mA-DC

Maximum Operating Current: 200 mA-DC (Relay outputs open) Generator/Mains Contactor Relay Outputs: 16 A / 250V DC Outputs: 1A @ 28V protected semiconductor output Current inputs: from CTs, .../5A. Max load 0.7VA per phase. Serial port: RS-232, 9600 bauds, no parity, 1 bit stop

Serial port: RS-232, 9600 bauds, no parity, 1 bit : Operating temp.: -20°C (-4°F) to 70 °C (158°F). Storage temp.: -40°C (-40°F) to 80 °C (176°F). Maximum humidity: 95% non-condensing. Dimensions: 172 x 134 x 46 mm (WxHxD)

Panel Cut-out Dimensions: 151x111 mm minimum.

Weight: 300 g (approx.)

Case Material: High Temperature ABS/PC (UL94-V0) IP Protection: IP65 from front panel, IP30 from the rear Installation: Flat surface mounting on a Type 1 enclosure.

CE Conformity reference standards:

EN 61010 (safety requirements) EN 61326 (EMC requirements)

UL / CSA Conformity: certificate # 20110527-E314374

UL 508, Edition 17 UL 2200, 1st Edition. UL 840 Edition 3

CSA C22.2 NO. 14 - Edition 10
